

Seals for Control and Identification

Advanced sealing technology from Unisto:

- Visual integrity check
- Regulatory Control
- Simplify control and checking procedures
- Prevent accidental or wilful contamination
- Ensure quality

Process Security – Guaranteed

Unisto are active in developing sealing solutions for process applications. Individual numbering, barcoding, colour coding and tamper-evident features prevent misuse, contamination or substitution. By providing a clear audit trail, Unisto seals can also assist with traceability and quality management, ensuring compliance with legislative and industry standards.

Modular Variable Length Seal

One of a range of variable length, pulltight seals, the Modular comes in a range of tag designs and sizes.

Also available with tear-off top tag for verification and tracking.

Drumlock Drum Seal

A new addition to the Unisto range, the Drumlock comes with a metal locking mechanism and insert.

Also available with a double bar code for verification and tracking.

Varis Pull-Through Seal

Unisto supply a wide range of pull-through seals including the Varis, for applications such as security bags, IBC taps, caps, drums and boxes. Many of these are available with tear-off and label holders.

MANTA® Reusable Electronic Seal

Security seal solution for sealing trailers, tankers and containers.

Provides 100 sealing event memory to cover multiple drops, audit trail downloadable via Unisto SealTrak handheld device. Can be configured using remote sensors to generate single load number for vehicles with multiple access points.
