- Expert advice

Improved Security – Tighter Control & Faster Identification

UNISTO

In today's fast moving transport and logistics industry security sealing is a vital way to control access to your load, ensuring goods are delivered intact and that your workforce is protected. Unisto security seals are used throughout the supply chain to achieve cost-effective security control. From a simple integrity check to fully integrated RFID solutions, Unisto seals offer unique features, including random number generation, tamper-evident mechanisms and fully integrated traffic management systems to help detect and prevent theft and improve internal controls.

Modular Variable Length Seal

Unisto supply a comprehensive range of pull-through and variable length seals in different tag designs and sizes.

Also available with tear-off and label holders.

OPTIMA 50mm padlock & sleeve

Complete padlock control sealing system with uniquely numbered tamper evident sleeve providing a clear audit trail.

Hi-Genius

High security solution for vehicles, containers & rail wagons with unique anti spin feature. Prevents illicit concealment or opportunist theft and can only be removed with bolt cutters.

HM Customs Accepted.

Crypta® 2K (C2K)

Reusable seal generates lit 4 digit random number display. Ruggedly built to withstand outdoor environment the Crypta® 2K is easy to fit and can be used with cable or remote sensors for multiple sealing points.
