- Versatile product range to suit a wide variety of requirements
- Reusable and single use seals
- Branded and customised seals available
- Expert advice

Cash and Valuables In Transit

Unisto security seals are used throughout the supply chain to achieve cost-effective security control. Unisto seals offer unique features, precision manufacturing, and tamper evident mechanisms that show up any attempt of tampering or manipulation. By providing a clear audit trail, Unisto seals can also assist with traceability and quality management, ensuring compliance with legislative and industry standards. With a complete range of security seals for applications within the high value goods, post and cash in transit sectors, including cash bags, ATM cassette boxes, mail bags and more, you can be sure Unisto have the solution for your security sealing needs.

Straplock Seal

Carton and pallet strapping seal. The Straplock has a 7-digit serial number and optional bar coding. Available with manual or electric sealing tool. Applications include ALCs, cardboard cartons, blocks of bank notes and pallets of high value goods.

Banco 4

The Banco 4 seal has been specifically designed for use on NCR ATM cassette boxes. Highly tamper evident, the seal can be fitted and removed quickly and simply. Directly laser marked bar coding provides fast and accurate data capture.

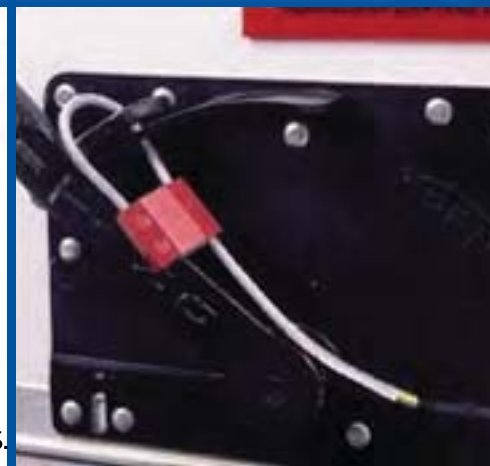

Twinstar

High security polypropylene seal with stainless steel locking mechanism. Suitable for bag and distribution box sealing. Numbered and bar-coded for efficient data capture, the Twinstar can be customised to suit your individual requirements.

Metalo 50

Unisto supply high security cable seals in a range of lengths, diameters and colours for applications such as vehicle doors, sea and air containers. Our cable seals are manufactured in conformance to ISO17712 (as specified by C-T PAT).
